

## **Repository of Public Actions in Lebanon**

The Public Action repository, is an interactive table, developed by [Lebanon Support](#), in partnership with the [United Nations Development Programme](#), that tracks the policy decisions taken by the state or its administration accordingly to the national constitutional laws and regulations.

- The repository is continuously updated.
- Each listed public action is coded based on a typology devised by Lebanon Support.
- The objective of the repository is to investigate public actions by providing **accurate data** and **relevant information** on policy decisions issued by the Lebanese state or its administration.

**Information source:** The official gazette, medias reports, NGOs reports, aid actors reports, as well as first hand data collected by the Lebanon Support team when applicable.

**Date of start of data collection:** January 2nd, 2018.

### **Tips for using our repository:**

- To get the most out of our repository, make sure to read the typology below.
- Our filters above can help you find public actions by date, acting body, type, category, and more. At least, one filter should be used for a search.
- The charts below help you identify the most repertoriated acting body, type, and category for public actions. You can also filter each chart by date.

## **Typology**

### **Categories**
